“Growth, Trade, and Patents: A Quantitative Evaluation of TRIPS” (joint with David Hémous, Simon Lepot, Thomas Sampson and Julian Schärer)

Abstract

„We develop a new quantitative model of growth, trade and patents and use this model to provide a first comprehensive quantitative analysis of the World Trade Organization’s agreement on Trade Related Intellectual Property Rights (TRIPS). We simulate noncooperative and cooperate patent choices and ask how far away TRIPS is from these extremes. “

All seminars are open to the public and take place in hybrid format with the lecturer present. For updates (place, abstracts etc.) kindly visit <https://wwz.unibas.ch/de/researchseminar/>
