I. General information

The economic approach helps gaining a better understanding of political institutions and processes as well as the outcomes in terms of economic and fiscal policy. The lecture focuses on the scientific discussion of theoretical models and related empirical research, as well as the possibilities and limitations of political economics. To facilitate such a discussion, students are expected to read the assigned texts in advance and to actively participate in the course.

II. Credits points and grading

A written exam will be conducted at the end of the course. The performance will be graded. 3 credits will be awarded for successful completion of the course.

III. Literature

The introductory literature for each topic is indicated in the program with an *I*. The further literature is indicated under *F*. In addition, basic texts *B* are referenced for some topics. Please consult the relevant papers if you have difficulty with the introductory literature. Additional works will be referred to during the course.

Electronic files of the listed literature will be made available to participants online via ADAM.
