Master of Science in Finance and Money

Are we a good match?

You're pursuing a career in financial management? Are you interested in topics and opportunities in the context of financial markets? Or in monetary policy and monetary systems instead?

The specialized master's program in Finance and Money provides you with the conceptual knowledge and the methodological skills required for professional financial decision making. You learn how to cope with finance related challenges in the private sector, in governmental functions, and in research. And you gain insights on new market developments.

The curriculum is set at the intersection of financial markets and the monetary system. It builds on the economic analysis of financial markets, financial contracts and monetary institutions as well as corporate financial management processes, such as financing, investments, and valuation. Bringing these elements together, the interaction of monetary policy, financial markets, digital transformation, and the current and future challenges for the banking system and financial institutions are at the core of this program.

The master's program in Finance and Money is both applied and research oriented. Throughout the curriculum, you can learn from a dedicated faculty known for its excellence in teaching and research.

Finance Fields of Specialization

- Financial Markets and Asset Pricing
- Monetary Economics and Macrofinance
- Financial Management and Investment
